SUPPLIERS OF MEDICAL & PHARMACY PRODUCTS

Medical Cold Wraps

Unlike other products that use a one-design-fits-all approach, our cold wrap offers a comprehensive range of lightweight, easy-to-use wraps that are anatomically engineered for specific body parts and available in a variety of sizes to assure optimal performance and comfortable fit.

Fixed Insulation

Gel ice pack

Isolation

The Cold Wrap reduces preoperative and postoperative pain, and acute injuries, helping to wean patients off of pain medication faster.
Our cold wrap also reduces pain and swelling leading to a faster and better return of motion, thereby reducing the risk of secondary complications.

Features

- Easy-to-use operation for clinic and home care, no danger of tissue damage and can be reused.
- Improved the patient's compliance and tolerance, especially for elder patients.
- Widely used in clinical, It can be used for hot and cold therapy.
- The use of more secure and convenient for hospital, school, sports teams and so on.
- Easy to use: store in the freezer approximately 60-90 minutes, then the wrap can be used.
